

Available with ERP 6.0 EhP3 - SAP Shift Notes and Shift Report (1)

SAP Shift Notes and Shift Report can be used:

- To report, to document (in pdf format) and to evaluate shift related events
- Events can be entered manually by shop floor workers or automatically by shop floor systems
- For shift hand-over or as a shift log
- For summary reports (e.g. weekly, monthly, yearly)

Functionality

- Contains all shift-relevant events and additional production and maintenance-related data
- Ability to search electronically for events in previous shifts reduces search effort dramatically
- Text modules ensure an easy and quick capture of comments
- SAP Shift Reports can be archived directly
- Connectivity to 3rd party systems via RFC modules
- Follow-up actions, input and authorization checks can be executed via interfaces
- Shift Reports can be created with reference to work centres / resources or with reference to functional locations / equipments.

The image displays two screenshots of the SAP Schichtbericht (Shift Report) interface. The left screenshot shows a table titled 'Rückmeldungen' (Feedback) with columns for 'Anzahl erfasseter Rückmeldungen' (Number of recorded feedback) and a list of entries. The right screenshot shows a table titled 'Liste der Instandhaltungsmaßnahmen' (Maintenance Measures) with columns for 'Anzahl erfasseter Instandhaltungsmaßnahmen' (Number of recorded maintenance measures) and a list of entries. Below the table, there is a bar chart and KPIs (Key Performance Indicators) for the shift.

Available with ERP 6.0 EhP3 - SAP Shift Notes and Shift Report (2)

Advantages

- Part of SAP ERP 6.0 EhP3, therefore no additional costs
- Solution replaces paper-based shift books
- Direct access to all important data within SAP system
- Easy integration of customer-specific data due to open interfaces
- Shift Report can be signed electronically; electronic signature fulfills requirements of the FDA
- No time consuming search because free text search functions are integrated

Customer statement

“The shift reporting functionality in SAP ERP is so easy to use. After a 10-minute demonstration, employees were able to use the software.”

Dietmar Wätzig, Production Supervisor, Imaging Division, Felix Schoeller Foto- und Spezialpapiere GmbH & Co. KG

Roadmap

Additional functionality is planned e.g.

- Cockpit to monitor all Shift Events
- Personalized automatic alerting
- User-optimized selection screens
- Integration of QM-Notifications
- Pre-View of Shift Report with direct access to objects
