Record Reasons for Value Changes
## Identification & Update of Input Fields in the XStep Repository

**Mark the XStep repository node, then call the search function**

Enter the search criteria

Double-click on a result list entry to navigate to the process instruction node

**Explode custom nodes of process instruction to get the input fields**

Switch to change mode using the context menu of the process instruction node

Maintain the settings to force entering reason for value change

Record Reasons for Value Changes – Added Old Value
